

The ExecutiveInsite Report

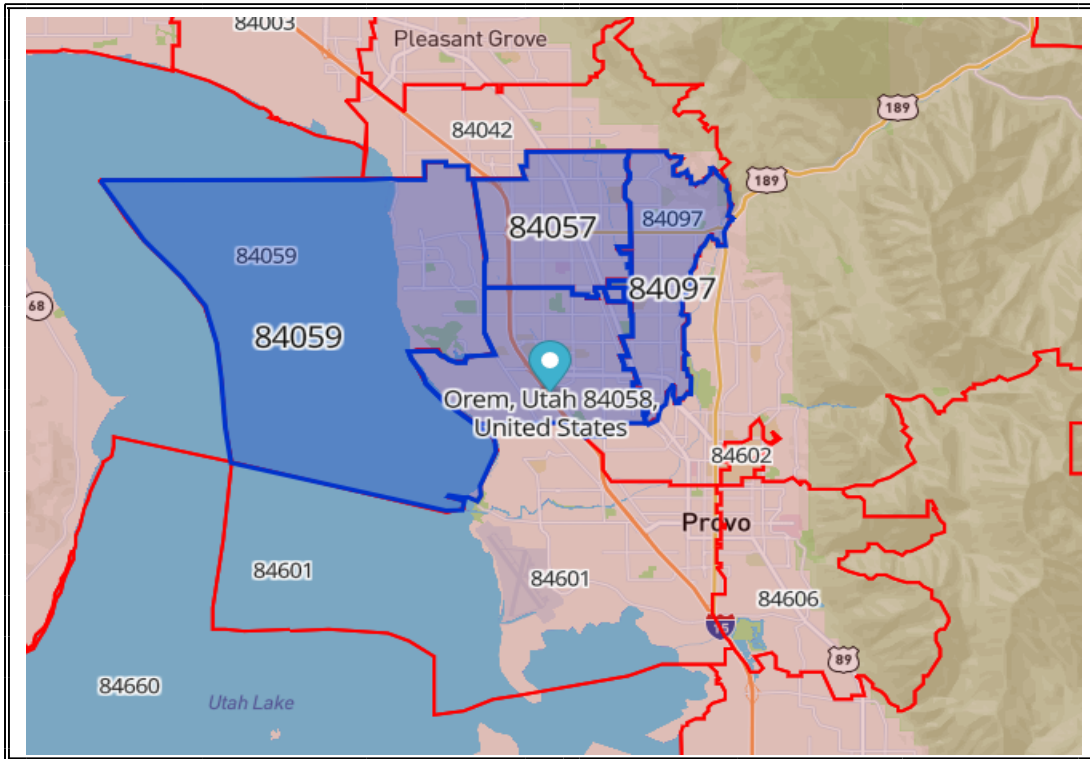

Prepared for: Orem, UT
 Study area: 84058, 84059, 84057, 84097
 Base State: UT

Current Year Estimate: 2023
 5 Year Projection: 2028
 Date: 1/10/2024
 Semi-Annual Projection: Spring

This ExecutiveInsite Report has been prepared for Orem, UT. Its purpose is to "tell the demographic story" of the defined geographic study area. ExecutiveInsite integrates narrative analysis with data tables and graphs. Playing on the report name, it includes 12 "Insites" into the study area's story. It includes both demographic and beliefs and practices data.

ExecutiveInsite is intended to give an overview analysis of the defined geographic study area. A defined study area can be a region, a zip code, a county or some custom defined geographic area such as a radius or a user defined polygon. The area of study is displayed in the map below.

THE STUDY AREA

THE 12 INSITES

INSITE	PAGE
Insite #1: Population, Household Trends	2
Insite #2: Racial/Ethnic Trends	3
Insite #3: Age Trends	4
Insite #4: School Aged Children Trends	6
Insite #5: Household Income Trends	7
Insite #6: Households and Children Trends	9
Insite #7: Marital Status Trends	10
Insite #8: Adult Educational Attainment	11
Insite #9: Employment and Occupations	12
Insite #10: Mosaic Household Types	13
Insite #11: Generations	14
Insite #12: Religious Program Or Ministry Preferences	15

More Information

Please refer to the last page of the report for additional notes and interpretation aides in reading the report.

Not all of the demographic variables available in the MI System are found in this report. The FullInsite Report will give a more comprehensive view of an area's demographics.

The American Beliefs Study provides a detailed view of religious preferences, practices and beliefs.

INSITE #1: POPULATION AND HOUSEHOLD TRENDS

Population:

The estimated 2023 population within the study area is 107,078. The 2028 projection would see the area remain stable at 1,070 to a total population of 108,148. The population within the study area is growing somewhat slower than the statewide growth rate. While the study area is projected to grow by 1.0% in the next five years, the state is projected to grow by 6.9%. The study area's estimated average change rate is 0.2%.

Households:

The households within the community are growing faster than the population, thus the average population per household in 2010 was 3.42 but by 2028 it is projected to be 3.40. Compare this to the statewide average which for the current year is estimated at 3.18 persons per household.

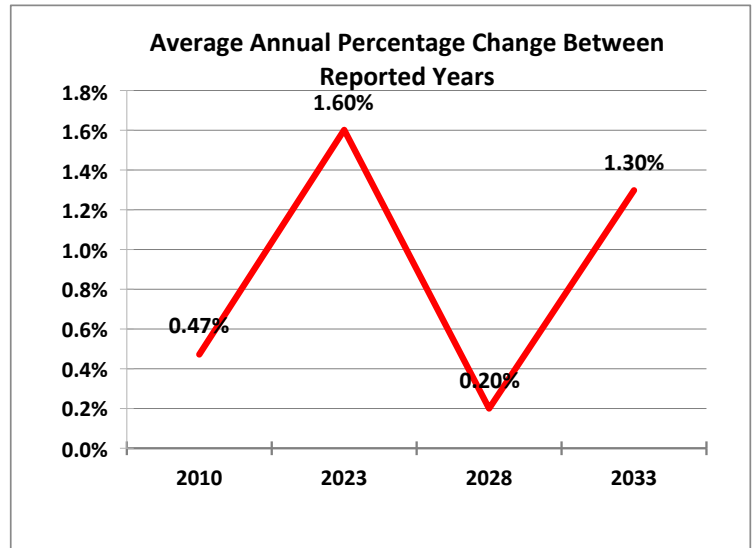

Population Per Household

Population per Household: The relationship between population and households provides a hint about how the community is changing. When population grows faster than households, it suggests an increase in the persons per household. This can only happen when more persons are added either by birth or other process such as young adults in multiple roommate households or young adults returning to live with parents. In some communities this can occur when multiple families live in the same dwelling unit.

Family Households:

Family households provide an additional hint about the changing dynamics of a community. If family household growth follows population growth, then it would be reasonable to assume that the increasing population per household comes from additional children. This is the case within the the study area. Family households are growing as fast as the population suggesting that the increasing population per household is from additional children.

Population/Households & Family Trends					
	2000	2010	2023	2028	2033
Population	84,630	88,623	107,078	108,148	115,167
Population Change		3,993	18,455	1,070	7,019
Percent Change		4.7%	20.8%	1.0%	6.5%
Households	23,562	25,911	31,488	31,830	33,943
Households Change		2,349	5,577	342	2,113
Percent Change		10.0%	21.5%	1.1%	6.6%
Population / Households	3.59	3.42	3.40	3.40	3.39
Population / Households Change		-0.17	-0.02	0.00	0.00
Percent Change		-4.8%	-0.6%	-0.1%	-0.1%
Families	2,927	3,705	4,568	4,647	
Families Change		778	863	79	
Percent Change		26.6%	23.3%	1.7%	

NOTE: Family Household data is not projected out 10 years.

INSITE #2: RACIAL-ETHNIC TRENDS

The US population's racial-ethnic diversity is continually adding new and rich cultural mixes. This data considers the five groups for which trending information is available. Please note that several groups are aggregated into a single category due to their smaller size. Those persons who indicated Hispanic or Latino ethnicity along with a racial category have been separated into a Hispanic or Latino category.

The Population: Racial/Ethnic Trends table provides the actual numbers and percentage of the total population for each of the five racial/ethnic categories. Pay special attention to the final column on the right. This will quickly indicate the direction of change from the last census to the current five year projection.

The Racial Ethnic Trends graph displays history and projected change by each racial/ethnic group.

This chart shows the percentage of each group for the current year estimate.

The percentage of the population...

Asian (Non-Hisp) is projected to remain about the same over the next five years.

Black/African American (Non-Hisp) is projected to remain about the same over the next five years.

White (Non-Hisp) is projected to remain about the same over the next five years.

Hispanic or Latino is projected to remain about the same over the next five years.

	2010	2023	2028	2010%	2023 %	2028 %	2010 to 2028 %pt Change
Race and Ethnicity							
Asian (NH)	1,692	1,996	2,033	1.91%	1.86%	1.88%	-0.03%
Black/Afr Amer (NH)	526	743	788	0.59%	0.69%	0.73%	0.14%
White (NH)	68,671	81,962	82,470	77.49%	76.54%	76.26%	-1.23%
Hispanic/Latino	14,262	17,387	17,580	16.09%	16.24%	16.26%	0.16%
P Is/Am In/Oth (NH)	3,473	4,989	5,277	3.92%	4.66%	4.88%	0.96%
Totals:	88,624	107,077	108,148				

INSITE #3: AGE TRENDS

A community's age structure and how it is changing is an important part of its story. Overall, the American Population has been aging as the Baby Boomers progress through each phase of life. This has been abetted by episodes of declining live births. However, this picture may particularize differently from community to community. There are communities in the US where the average age is lower than some others. In other cases, there is a clear shift toward senior years as the Boomers enter their retirement years.

The Age Trend Insite explores two variables: Average age and Phase of Life.

Average Age Trends provides five important snapshots of a community from five data points; the 2000 census, the last census, the current year estimate, the five-year projection and the ten year forecast. These five numbers will indicate the aging direction of a community.

The Phase of Life Trends breaks the population into seven life phases that the population passes through in its life time.

AGE

<i>Average Age Trends</i>	2000	2010	2023	2028	2033
Average Age: Study Area	28.65	30.27	32.37	32.97	33.79
Percent Change		5.7%	6.9%	1.9%	2.5%
Average Age: UT	31.14	31.80	34.35	35.18	35.82
Percent Change		2.1%	8.0%	2.4%	1.8%
Comparative Index	92	95	94	94	94
Median Age: Study Area	23	25	29	29	29

Summary of Average Age Findings:

The Average Age Trend chart shows both history and projection of the change in average age in the study area. The average age of the study area has been rising for several years. It is projected to rise over the next five years.

A comparison to the average age of the state helps to contextualize the significance of the average age of the study area and its history and projection. In the graph above, the study area and state are laid out side by side. The state's average age is estimated to be higher than the study area.

INSITE #3: AGE TRENDS (continued)

PHASE OF LIFE

The Phase of Life analysis provides insight into the age distribution of a population across the different stages of life experience. It can reveal a community in transition.

Pay special attention to the color codes of the Change column (far right below). It will immediately indicate which phases are increasing or decreasing as a percentage of the population.

Phase of Life	2010	2023	2028	2033	2010%	2023%	2028%	2033%	Estimated 10 Year %pt Change 2023 - 2033
Before Formal Schooling									
Ages 0 to 4	9,052	10,123	9,582	9,127	10.2%	9.5%	8.9%	7.9%	-1.5%
Required Formal Schooling									
Ages 5 to 17	18,373	22,607	22,920	24,728	20.7%	21.1%	21.2%	21.5%	0.4%
College/Career Starts									
Ages 18 to 24	14,303	13,496	14,500	15,153	16.1%	12.6%	13.4%	13.2%	0.6%
Singles & Young Families									
Ages 25 to 34	15,989	15,604	13,301	14,567	18.0%	14.6%	12.3%	12.6%	-1.9%
Families & Empty Nesters									
Ages 35 to 54	16,650	26,655	29,089	30,660	18.8%	24.9%	26.9%	26.6%	1.7%
Enrichment Years Sing/Couples									
Ages 55 to 64	6,863	7,610	7,160	8,507	7.7%	7.1%	6.6%	7.4%	0.3%
Retirement Opportunities									
Age 65 and over	7,392	10,982	11,596	12,426	8.3%	10.3%	10.7%	10.8%	0.5%

Summary of Phase of Life Findings:

Phase of Life changes reflect the age profile of a community. On average, it takes 2.1 children per woman to replace both mother and father. If the percentage of the population under 20 is declining as a percentage of the total it is likely that the community will see an increase in the more senior aged population possibly due to a decline in birth rates.

In this study area children 17 years of age and younger are declining as a percentage of the total population. Considering the other end of the phases of life, adults 55 years of age and older are increasing as a percentage of the total population.

In summary it may be that the community is aging as children are raised and leave but parents remain.

INSITE #4: SCHOOL AGED CHILDREN TRENDS

Children are the future! Understanding their specific population dynamics is critical for all planners of social and/or educational services. The “School Aged Children” variable is a subset of the “Required Formal Schooling” segment in the Phase of Life profile. It allows one to zoom in more closely on the children who are of formal schooling age.

The School Aged Children variable provides a snapshot of three levels of the population that comprise school age children. The three levels roughly correspond to the following.

- Elementary grades
- Intermediate/Middle School grades
- High School grades

The school aged population includes all school aged children including those enrolled in public and private schools, those home schooled and children in institutions.

School Aged Children	2010	2023	2028	2010%	2023%	2028%	Estimated 5 Year %pt Change 2023 - 2028
Early Elementary Ages 5 to 9	7,293	9,147	9,682	39.7%	40.5%	42.2%	1.8%
Late Elementary-Middle School Ages 10 to 14	6,727	8,364	8,448	36.6%	37.0%	36.9%	-0.1%
High School Ages 15 to 17	4,353	5,097	4,790	23.7%	22.5%	20.9%	-1.6%

Summary of School Aged Children Findings:

Early Elementary children ages 5 to 9 are projected to increase as a percentage of children between 5 and 17 by 1.8%.

High School aged children 15 to 17 are declining as a percentage of children between 5 and 17 by -1.6%.

Late Elementary to Middle School aged children ages 10 to 14 are declining as a percentage of children between 5 and 17 by -0.1%.

Overall, children are aging through, but there is some evidence of a resurgence of children in the younger years.

INSITE #5: HOUSEHOLD AND FAMILY INCOME TRENDS

AVERAGE HOUSEHOLD INCOME AND PER CAPITA INCOME

Average Household Income and Per Capita Income indicate the level of financial resources within a community. Average Household income reflects the average income for each household, whether family or non-family.

Per Capita Income is a measure of the average income of all persons within a household. For family households, this would include all children. It does not mean that each person actually contributes to the average income from work. It is calculated by dividing the aggregate household income by the population.

In this study area, the estimated current year average household income is \$97,979. The average household income is projected to grow by 20.7% to \$118,230.

The estimated per capita income for the current year is \$28,812. The Per Capita Income is projected to grow by 20.8% to \$34,797.

Income Trends	2010	2023	2028	2010%	2023%	2028%	Estimated 5 Year %pt Change 2023 - 2028
Households							
Less than \$10,000	1,099	975	770	4.2%	3.1%	2.4%	-0.7%
\$10,000 to \$14,999	1,269	655	520	4.9%	2.1%	1.6%	-0.4%
\$15,000 to \$24,999	2,478	1,747	1,349	9.6%	5.5%	4.2%	-1.3%
\$25,000 to \$34,999	2,940	2,545	1,942	11.3%	8.1%	6.1%	-2.0%
\$35,000 to \$49,999	4,718	3,714	2,892	18.2%	11.8%	9.1%	-2.7%
\$50,000 to \$74,999	4,968	6,245	5,620	19.2%	19.8%	17.7%	-2.2%
\$75,000 to \$99,999	3,525	4,611	4,589	13.6%	14.6%	14.4%	-0.2%
\$100,000 to \$149,999	3,289	5,802	6,445	12.7%	18.4%	20.2%	1.8%
\$150,000 to \$199,999	882	2,995	3,612	3.4%	9.5%	11.3%	1.8%
\$200,000 or more	742	2,199	4,089	2.9%	7.0%	12.8%	5.9%
Totals	25,910	31,488	31,828				

INSITE #5: HOUSEHOLD AND FAMILY INCOME TRENDS (continued)

FAMILY INCOME

Family income is a sub-set of household income. It excludes non-family households. Family households include two or more persons who are related and living in the same dwelling unit. Children are more likely to live in family households. Non-family households are households in which two or more persons live in the same dwelling unit but are unrelated.

The number of families with annual incomes above \$100,000 is projected to decline over the next five years. For the current year, it is estimated that 38.9% of all family incomes exceed \$100,000 per year. In five years that number is projected to be 38.8%.

Income Trends	2023	2028	2023%	2028%	Estimated 5 Year %pt Change 2023 - 2028
Families					
Less than \$10,000	490	467	2.0%	1.9%	-0.11%
\$10,000 to \$14,999	321	298	1.3%	1.2%	-0.11%
\$15,000 to \$24,999	994	953	4.1%	3.9%	-0.21%
\$25,000 to \$34,999	1,687	1,881	7.0%	7.7%	0.73%
\$35,000 to \$49,999	2,628	2,619	10.9%	10.8%	-0.15%
\$50,000 to \$74,999	4,865	4,877	20.2%	20.0%	-0.15%
\$75,000 to \$99,999	3,748	3,789	15.6%	15.6%	0.01%
\$100,000 to \$149,999	4,989	5,037	20.7%	20.7%	-0.01%
\$150,000-\$199,999	2,567	2,601	10.7%	10.7%	0.03%
\$200,000 or more	1,809	1,818	7.5%	7.5%	-0.04%
Totals	24,098	24,340			

MEDIAN INCOME BY RACE AND ETHNICITY

Median income by race and ethnicity is a subset of household income. Median income is that point where there are as many households with incomes greater than the median as there are households with incomes less than the median.

Median Income by Race and Ethnicity	2023
Asian Household Income	\$66,358
Black/ African American Household Income	\$95,348
Hispanic/Latino Household Income	\$60,658
White/Anglo Household Income	\$79,629
P Is, Am Indian Other Household Income	\$66,402
Average	\$73,679

INSITE #6: HOUSEHOLDS AND CHILDREN TRENDS

Diversity of child rearing environments is increasing along with the many other types of growing diversity in the US. To understand this, we begin with the types of households that exist in a community. There are...

- family households with children under 18
- family households without children under 18

The concern of this analysis is family households with children under 18. Of the types of family households with children there are...

- Married couple families
- Single parent families (father or mother)

These two are reported for the study area in the table below.

Households	2010	2023	2028	2010%	2023%	2028%	Estimated 5 Year %pt Change 2023 - 2028
Households with Children under 18							
Married Couple	9,520	9,273	8,921	82.5%	83.0%	82.2%	-0.8%
Single Parent	2,023	1,900	1,933	17.5%	17.0%	17.8%	0.8%

Of the households with children under 18, married couple households are decreasing as a percentage while single parent households are increasing. The graph to the right illustrates this. Bars above the 0% point indicate a family type that is increasing while bars below 0% is decreasing. This provides "insite" into how family households and structures with children are changing in the study area.

A comparison to the state reveals to what extent this community is similar or dissimilar to the state as a whole. The study area's married couple households with children are similar to the state's profile. The percentage of single parent households with children is less than the state.

INSITE #7: MARITAL STATUS TRENDS

MARITAL STATUS BY TYPE

Population by Marital Status considers the number and percentage of persons 15 years of age and greater by their current marital status. Trend information as well as a comparison to the study area's state marital status types provide two different views of this social reality.

Marital types reported include..

- Never Married (Singles)
- Currently Married
- Divorced
- Separated
- Widowed

	2010	2023	2028	2010%	2023%	2028%	2010 to 2028 %pt Change
Population by Marital Status: Age 15+							
Never Married	22,226	27,045	27,190	33.3%	33.3%	33.1%	-0.1%
Married	37,483	45,660	46,230	56.1%	56.2%	56.3%	0.3%
Divorced	4,171	5,244	5,425	6.2%	6.5%	6.6%	0.4%
Separated	768	810	775	1.1%	1.0%	0.9%	-0.2%
Widowed	2,195	2,454	2,446	3.3%	3.0%	3.0%	-0.3%

In this community, the current year estimate of marital status reveals a community of adults less likely to be married than the state average for adults. The percentage single, never married in the study area is higher than the state average for adults 15 years and older. Divorce is less prevalent than the state wide average.

Women 15 years and older are more likely to be divorced than men.

Women 15 years and older are more likely to be widowed than men.

INSITE #8: ADULT EDUCATIONAL ATTAINMENT

The level of educational attainment of a community's adult population is an important indicator of its opportunities and challenges. This analysis will look at the Adult Educational Attainment from three perspectives.

First, it looks to see if the level of educational attainment for adults is rising or not. Second, it compares the level of attainment to that of the state of UT. (If this is a state report, the comparison will be to itself.) Finally, the table provides the percentages from 2010.

EDUCATIONAL LEVEL ATTAINMENT CHANGE

The educational attainment level of adults has been rising over the past few years. It is projected to rise over the next five years by 0.7%.

EDUCATIONAL LEVEL COMPARED TO THE STATE

	2010	2023	2028	UT 2023%	2023 Study Area-State Comp Index
Population by Educational Attainment: 25+					
Less than 9th Grade	3.4%	2.1%	2.1%	2.4%	86
Some HS	4.4%	3.6%	3.5%	4.4%	81
HS Dipl or GED	15.9%	15.4%	15.5%	22.6%	68
Some College	29.0%	25.4%	24.7%	25.3%	100
Associate Degree	10.8%	11.1%	11.0%	10.0%	112
Bachelor's Degree	25.1%	28.5%	29.0%	23.5%	121
Grad/Profess Deg	11.4%	13.9%	14.2%	11.9%	118

The overall educational attainment of the adults in this community is greater than the state.

INSITE #9: POPULATION BY EMPLOYMENT

Like educational attainment, an analysis of a community by its employment types and categories provides an important “insite” into its socio-economics. This analysis looks at two factors.

First is a report of the employed population 16 and over by the traditional “blue collar” and “white collar” occupations and compares these to the state. Second, it looks at the community by the seven standard census bureau occupations and compares them to the state.

EMPLOYED POPULATION: BLUE COLLAR OR WHITE COLLAR

On the chart to the left, the study area is compared to the state of UT. This study area is close to the state average for White Collar workers. It is close to the state average for Blue Collar workers.

EMPLOYED CIVILIAN POPULATION BY OCCUPATION

	2023	UT 2023	Comp. Index	Interpretation
Employed Civilian Pop 16+ by Occupation				
Bldg Maintenance & Cleaning	3.8%	3.3%	113	Well above the state average.
Construction	8.0%	8.7%	91	At about the state average.
Farming, Fishing, & Forestry	0.2%	0.3%	55	Well below the state average.
Food Preparation Serving	5.6%	4.5%	123	Well above the state average.
Healthcare Support	3.3%	2.5%	134	Well above the state average.
Managerial Executive	16.4%	16.8%	97	At about the state average.
Office Admin	14.2%	13.1%	108	At about the state average.
Personal Care	2.2%	2.6%	85	Well below the state average.
Production Transportation	10.3%	12.9%	80	Well below the state average.
Prof Specialty	24.7%	23.6%	105	At about the state average.
Protective	1.1%	1.6%	66	Well below the state average.
Sales	10.4%	9.9%	104	At about the state average.

INSITE #10: MOSAIC Segments

Mosaic is a geo-demographic segmentation system developed by and for marketers. Instead of looking at individual demographic variables, a segmentation system clusters households into groups with multiple common characteristics. Demographic variables that generally cluster together would include income, educational levels, presence of children and occupations among others.

This database is developed by Experian. Some find the information helpful because it presents a multi-dimensional view of a community.

In the report below, the top 15 Mosaic Segments of the study area are provided. (If less than 15, rows will be blank.)

NOTE: For a full description please see the DI Demographic Segment Guide (Mosaic) under the Help menu on the Documents gallery.

	2023	2023%	State %	Comp Index	Relative to the UT State Ave.
Mosaic Segments					
O51 Singles and Starters - Digitally Savvy	4,033	12.8%	6.8%	188	Well above the state average
F22 Promising Families - Fast Track Couples	3,488	11.1%	9.5%	117	Somewhat above the state average
O55 Singles and Starters - Family Troopers	2,517	8.0%	3.3%	245	Well above the state average
D16 Suburban Style - Settled in Suburbia	1,997	6.3%	2.2%	287	Well above the state average
E20 Thriving Boomers - No Place Like Home	1,829	5.8%	3.5%	168	Well above the state average

INSITE #11: GENERATIONS

A powerful way to envision demographics is by following a generation through its phases of life. This is because there are, in a general sense, common life experiences at each phase of life. But even more interesting is to understand a generational cohort group that has a unique sense of belonging to others born and coming of age together. More than mere age bracketing, a generation develops a sense of identity as a group based upon their coming of age experiences—how they were parented and major world defining events, such as 9/11. Using the Strauss and Howe model of generations one is able to see a more three-dimensional view of a generational group, bringing mere age demographics to life.

According to the Strauss and Howe model, members of a generation share three qualities. *

- An age location in history
- Some common beliefs and behaviors, including basic attitudes about risk taking, culture and values, civic engagement, and family life
- A common perceived membership in a generation, e.g., Boomers, Gen X, Millennials etc.

Spiritual discussion groups	39.8%	13.3%	38.9%	11.1%	102	120
Traditional worship experiences	38.6%	25.4%	39.1%	24.3%	99	105
Warm and friendly encounters	41.6%	39.6%	44.1%	35.8%	94	110

Supporting Information

Interpreting the Report

The ExecutiveInsite report is designed for easy reading. But there are several tools provided in the tables that make this easier.

Change over time: Several trend tables have a column indicating a change over time. Generally these tables begin with the last census, include the current year estimate, a five year projection and if available, a 10 year forecast. The data in each cell represents a percentage change up or down.

Color Coding: Both the "Change over Time" and "Comparative Indexes" columns are color coded to easily spot any change and the direction of that change.

Change:	Increasing	Stable	Declining
Index:	Above Ave	Ave	Below Ave.

Variable Definitions

Full variable definitions can be found in the MI Demographic Reference Guide. Download it free from the Help/Documents menu located on the map screen of your

[Click to download the ExecutiveInsite Worksheet. To open it in a new tab, press Ctrl when you click.](#)

Indexes: Some variables will have a column called "Comparative Index." An index is an easy way to compare a study area with a larger area. For this report, all comparisons are with the state or states within which the study area falls. The indexes can be interpreted as follows.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.
