

# INSITE #1: POPULATION AND HOUSEHOLD TRENDS

## Population:

The estimated 2023 population within the study area is 129,092. The 2028 projection would see the area grow by 17,925 to a total population of 147,017. The population within the study area is growing somewhat faster than the statewide growth rate. While the study area is projected to grow by 13.9% in the next five years, the state is projected to grow by 7.1%. The study area's estimated average change rate is 2.8%.

## Households:

The households within the community are growing but not as fast as the population, thus the average population per household in 2010 was 2.92 but by 2028 it is projected to be 2.94. Compare this to the statewide average which for the current year is estimated at 2.83 persons per household.

## Population Per Household

Population per Household: The relationship between population and households provides a hint about how the community is changing. When population grows faster than households, it suggests an increase in the persons per household. This can only happen when more persons are added either by birth or other process such as young adults in multiple roommate households or young adults returning to live with parents. In some communities this can occur when multiple families live in the same dwelling unit.

## Family Households:

Family households provide an additional hint about the changing dynamics of a community. If family household growth follows population growth, then it would be reasonable to assume that the increasing population per household comes from additional children. However, within the study area, this is not the case. Family households are not growing as fast as the population, suggesting the growth may be the result of growth of non-family adult households.

<i>Population/Households &amp; Family Trends</i>					
	2000	2010	2023	2028	2033
<b>Population</b>	<b>61,350</b>	<b>90,164</b>	<b>129,092</b>	<b>147,017</b>	<b>171,708</b>

Percent Change		60.5%	38.8%	12.3%	

NOTE: Family Household data is not projected out 10 years.

## INSITE #2: RACIAL-ETHNIC TRENDS

The US population's racial-ethnic diversity is continually adding new and rich cultural mixes. This data considers the five groups for which trending information is available. Please note that several groups are aggregated into a single category due to their smaller size. Those persons who indicated Hispanic or Latino ethnicity along with a racial category have been separated into a Hispanic or Latino category.

The Population: Racial/Ethnic Trends table provides the actual numbers and percentage of the total population for each of the five racial/ethnic categories. Pay special attention to the final column on the right. This will quickly indicate the direction of change from the last census to the current five year projection.

The Racial Ethnic Trends graph displays history and projected change by each racial/ethnic group.

This chart shows the percentage of each group for the current year estimate.

### The percentage of the population...

Asian (Non-Hisp) is projected to remain about the same over the next five years.

Black/African American (Non-Hisp) is projected to remain about the same over the next five years.

White (Non-Hisp) is projected to remain about the same over the next five years.

Hispanic or Latino is projected to remain about the same over the next five years.

	2010	2023	2028	2010%	2023 %	2028 %	2010 to 2028 %pt Change
<b>Race and Ethnicity</b>

<b>Totals:</b>	<b>90,165</b>	<b>129,093</b>	<b>147,017</b>				

# INSITE #3: AGE TRENDS

A community's age structure and how it is changing is an important part of its story. Overall, the American Population has been aging as the Baby Boomers progress through each phase of life. This has been abetted by episodes of declining live births. However, this picture may particularize differently from community to community. There are communities in the US where the average age is lower than some others. In other cases, there is a clear shift toward senior years as the Boomers enter their retirement years.

The Age Trend Insite explores two variables: Average age and Phase of Life.

**Average Age Trends provides five important snapshots of a community from five data points; the 2000 census, the last census, the current year estimate, the five-year projection and the ten year forecast. These five numbers will indicate the aging direction of a community.**

**The Phase of Life Trends breaks the population into seven life phases that the population passes through in its life time.**

## AGE

<i>Average Age Trends</i>	2000	2010	2023	2028	2033
<b>Average Age: Study Area</b>	<b>36.09</b>	<b>36.33</b>	<b>36.84</b>	<b>36.66</b>	<b>36.39</b>
Percent Change		0.7%	1.4%	-0.5%	-0.7%
<b>Average Age: UT,AZ</b>	<b>34.42</b>	<b>35.26</b>	<b>37.94</b>	<b>38.57</b>	<b>38.94</b>
Percent Change		2.4%	7.6%	1.7%	1.0%
Comparative Index	105	103	97	95	93
<b>Median Age: Study Area</b>	<b>30</b>	<b>31</b>	<b>32</b>	<b>32</b>	<b>32</b>

### Summary of Average Age Findings:

The Average Age Trend chart shows both history and projection of the change in average age in the study area. The average age of the study area has been rising for several years. It is projected to remain relatively the same over the next five years.

A comparison to the average age of the state helps to contextualize the significance of the average age of the study area and its history and projection. In the graph above, the study area and state are laid out side by side. The state's average age is estimated to be about the same as the study area.

# INSITE #3: AGE TRENDS (continued)

## PHASE OF LIFE

The Phase of Life analysis provides insight into the age distribution of a population across the different stages of life experience. It can reveal a community in transition.

Pay special attention to the color codes of the Change column (far right below). It will immediately indicate which phases are increasing or decreasing as a percentage of the population.

Phase of Life	2010	2023	2028	2033	2010%	2023%	2028%	2033%	Estimated 10 Year %pt Change 2023 - 2033
<b>Before Formal Schooling</b>									
Ages 0 to 4	7,968	10,185	11,843	14,161	8.8%	7.9%	8.1%	8.2%	0.4%
<b>Required Formal Schooling</b>									
Ages 5 to 17	18,243	25,318	27,797	33,072	20.2%	19.6%	18.9%	19.3%	-0.4%
<b>College/Career Starts</b>									
Ages 18 to 24	9,657	15,010	17,133	18,190	10.7%	11.6%	11.7%	10.6%	-1.0%
<b>Singles &amp; Young Families</b>									
Ages 25 to 34	12,059	17,253	20,547	24,635	13.4%	13.4%	14.0%	14.3%	1.0%
<b>Families &amp; Empty Nesters</b>									
Ages 35 to 54	17,219	28,119	33,431	40,265	19.1%	21.8%	22.7%	23.4%	1.7%
<b>Enrichment Years Sing/Couples</b>									
Ages 55 to 64	8,614	10,810	12,065	14,983	9.6%	8.4%	8.2%	8.7%	0.4%
<b>Retirement Opportunities</b>									
Age 65 and over	16,404	22,397	24,200	26,403	18.2%	17.3%	16.5%	15.4%	-2.0%

### Summary of Phase of Life Findings:

Phase of Life changes reflect the age profile of a community. On average, it takes 2.1 children per woman to replace both mother and father. If the percentage of the population under 20 is declining as a percentage of the total it is likely that the community will see an increase in the more senior aged population possibly due to a decline in birth rates.

In this study area children 17 years of age and younger are increasing as a percentage of the total population. Considering the other end of the phases of life, adults 55 years of age and older are declining as a percentage of the total population.

In summary it may be that the community is experiencing some growth of children of school age.

# INSITE #4: SCHOOL AGED CHILDREN TRENDS

Children are the future! Understanding their specific population dynamics is critical for all planners of social and/or educational services. The “School Aged Children” variable is a subset of the “Required Formal Schooling” segment in the Phase of Life profile. It allows one to zoom in more closely on the children who are of formal schooling age.

The school aged population includes all school aged children including those enrolled in public and private schools, those home schooled and children in institutions.

The School Aged Children variable provides a snapshot of three levels of the population that comprise school age children. The three levels roughly correspond to the following.

- Elementary grades
- Intermediate/Middle School grades
- High School grades

School Aged Children	2010	2023	2028	2010%	2023%	2028%	Estimated 5 Year %pt Change 2023 - 2028
<b>Early Elementary</b>							
Ages 5 to 9	7,338	9,865	11,208	40.2%	39.0%	40.3%	1.4%
<b>Late Elementary-Middle School</b>							
Ages 10 to 14	6,811	9,303	10,435	37.3%	36.7%	37.5%	0.8%
<b>High School</b>							
Ages 15 to 17	4,094	6,151	6,154	22.4%	24.3%	22.1%	-2.2%

### Summary of School Aged Children Findings:

Early Elementary children ages 5 to 9 are projected to increase as a percentage of children between 5 and 17 by 1.4%.

Late Elementary to Middle School aged children ages 10 to 14 are increasing as a percentage of children between 5 and 17 by 0.8%.

High School aged children 15 to 17 are declining as a percentage of children between 5 and 17 by -2.2%.

Overall, children are aging through, but there is some evidence of a resurgence of children in the younger years.

# INSITE #5: HOUSEHOLD AND FAMILY INCOME TRENDS

## AVERAGE HOUSEHOLD INCOME AND PER CAPITA INCOME

Average Household Income and Per Capita Income indicate the level of financial resources within a community. Average Household income reflects the average income for each household, whether family or non-family.

Per Capita Income is a measure of the average income of all persons within a household. For family households, this would include all children. It does not mean that each person actually contributes to the average income from work. It is calculated by dividing the aggregate household income by the population.

In this study area, the estimated current year average household income is \$89,074. The average household income is projected to grow by 21.4% to \$108,123.

The estimated per capita income for the current year is \$30,332. The Per Capita Income is projected to grow by 21.1% to \$36,741.

Income Trends	2010	2023	2028	2010%	2023%	2028%	Estimated 5 Year %pt Change 2023 - 2028
<b>Households</b>							
Less than \$10,000	1,422	1,822	1,232	4.6%	4.1%	2.5%	-1.7%
\$10,000 to \$14,999	1,204	1,391	1,026	3.9%	3.2%	2.1%	-1.1%
\$15,000 to \$24,999	3,448	2,699	2,513	11.2%	6.1%	5.0%	-1.1%
\$25,000 to \$34,999	3,708	4,471	3,686	12.0%	10.2%	7.4%	-2.8%
\$35,000 to \$49,999	5,698	5,462	5,028	18.5%	12.4%	10.1%	-2.4%
\$50,000 to \$74,999	7,234	8,462	8,628	23.5%	19.2%	17.3%	-2.0%
\$75,000 to \$99,999	3,754	5,945	7,512	12.2%	13.5%	15.0%	1.5%
\$100,000 to \$149,999	2,962	7,915	9,587	9.6%	18.0%	19.2%	1.2%
\$150,000 to \$199,999	661	3,241	5,204	2.1%	7.4%	10.4%	3.0%
\$200,000 or more	739	2,552	5,541	2.4%	5.8%	11.1%	5.3%
<b>Totals</b>	<b>30,830</b>	<b>43,960</b>	<b>49,957</b>				

# INSITE #5: HOUSEHOLD AND FAMILY INCOME TRENDS (continued)

## FAMILY INCOME

Family income is a sub-set of household income. It excludes non-family households. Family households include two or more persons who are related and living in the same dwelling unit. Children are more likely to live in family households. Non-family households are households in which two or more persons live in the same dwelling unit but are unrelated.

The number of families with annual incomes above \$100,000 is projected to grow over the next five years. For the current year, it is estimated that 36.5% of all family incomes exceed \$100,000 per year. In five years that number is projected to be 36.7%.

Income Trends	2023	2028	2023%	2028%	Estimated 5 Year %pt Change 2023 - 2028
<b>Families</b>					
Less than \$10,000	706	781	2.1%	2.1%	-0.08%
\$10,000 to \$14,999	630	703	1.9%	1.9%	-0.05%
\$15,000 to \$24,999	1,363	1,551	4.1%	4.1%	-0.04%
\$25,000 to \$34,999	2,643	3,179	8.0%	8.4%	0.38%
\$35,000 to \$49,999	3,711	4,212	11.2%	11.1%	-0.13%
\$50,000 to \$74,999	6,656	7,550	20.2%	19.9%	-0.25%
\$75,000 to \$99,999	5,230	6,006	15.9%	15.9%	0.00%
\$100,000 to \$149,999	6,868	7,901	20.8%	20.9%	0.03%
\$150,000-\$199,999	2,915	3,381	8.8%	8.9%	0.09%
\$200,000 or more	2,267	2,625	6.9%	6.9%	0.06%
<b>Totals</b>	<b>32,989</b>	<b>37,889</b>			

## MEDIAN INCOME BY RACE AND ETHNICITY

Median income by race and ethnicity is a subset of household income. Median income is that point where there are as many households with incomes greater than the median as there are households with incomes less than the median.

Median Income by Race and Ethnicity	2023
Asian Household Income	\$28,749
Black/ African American Household Income	\$44,035
Hispanic/Latino Household Income	\$53,884
White/Anglo Household Income	\$70,128
P Is, Am Indian Other Household Income	\$58,891
<b>Average</b>	<b>\$51,137</b>

# INSITE #6: HOUSEHOLDS AND CHILDREN TRENDS

Diversity of child rearing environments is increasing along with the many other types of growing diversity in the US. To understand this, we begin with the types of households that exist in a community. There are...

- family households with children under 18
- family households without children under 18

The concern of this analysis is family households with children under 18. Of the types of family households with children there are...

- Married couple families
- Single parent families (father or mother)

These two are reported for the study area in the table below.

Households	2010	2023	2028	2010%	2023%	2028%	Estimated 5 Year %pt Change 2023 - 2028
<b>Households with Children under 18</b>							
Married Couple	8,272	10,012	11,280	76.7%	77.0%	76.5%	-0.6%
Single Parent	2,511	2,987	3,472	23.3%	23.0%	23.5%	0.6%

Of the households with children under 18, married couple households are decreasing as a percentage while single parent households are increasing. The graph to the right illustrates this. Bars above the 0% point indicate a family type that is increasing while bars below 0% is decreasing. This provides "insite" into how family households and structures with children are changing in the study area.

A comparison to the state reveals to what extent this community is similar or dissimilar to the state as a whole. The study area's married couple households with children are dissimilar to the state's profile. The percentage of single parent households with children is less than the state.

# INSITE #7: MARITAL STATUS TRENDS

## MARITAL STATUS BY TYPE

Population by Marital Status considers the number and percentage of persons 15 years of age and greater by their current marital status. Trend information as well as a comparison to the study area's state marital status types provide two different views of this social reality.

Marital types reported include..

- Never Married (Singles)
- Currently Married
- Divorced
- Separated
- Widowed

	2010	2023	2028	2010%	2023%	2028%	2010 to 2028 %pt Change
<b>Population by Marital Status: Age 15+</b>							
Never Married	14,788	24,949	28,282	21.3%	24.5%	24.4%	3.1%
Married	44,416	59,018	67,366	64.1%	57.9%	58.2%	-5.8%
Divorced	5,550	10,365	11,626	8.0%	10.2%	10.0%	2.0%
Separated	861	1,612	1,818	1.2%	1.6%	1.6%	0.3%
Widowed	3,710	5,932	6,595	5.4%	5.8%	5.7%	0.3%

In this community, the current year estimate of marital status reveals a community of adults more likely to be married than the state average for adults. The percentage single never married is lower than the state average for adults 15 years and older. Divorce is less prevalent than the state average.

Women 15 years and older are more likely to be divorced than men.

Women 15 years and older are more likely to be widowed than men.

# INSITE #8: ADULT EDUCATIONAL ATTAINMENT

The level of educational attainment of a community's adult population is an important indicator of its opportunities and challenges. This analysis will look at the Adult Educational Attainment from three perspectives.

First, it looks to see if the level of educational attainment for adults is rising or not. Second, it compares the level of attainment to that of the state of UT,AZ. (If this is a state report, the comparison will be to itself.) Finally, the table provides the percentages from 2010.

## EDUCATIONAL LEVEL ATTAINMENT CHANGE

The educational attainment level of adults has been rising over the past few years. It is projected to rise over the next five years by 0.6%.

## EDUCATIONAL LEVEL COMPARED TO THE STATE

	2010	2023	2028	UT,AZ 2023%	2023 Study Area-State Comp Index
<b>Population by Educational Attainment: 25+</b>					
Less than 9th Grade	3.2%	2.3%	2.2%	4.2%	54
Some HS	6.7%	3.9%	3.7%	6.1%	63
HS Dipl or GED	27.7%	23.0%	22.5%	23.2%	99
Some College	30.0%	28.9%	29.0%	24.8%	117
Associate Degree	8.3%	14.2%	14.5%	9.3%	153
Bachelor's Degree	16.2%	16.9%	17.0%	20.5%	83
Grad/Profess Deg	7.9%	10.8%	11.0%	11.9%	90

The overall educational attainment of the adults in this community is greater than the state.

## INSITE #9: POPULATION BY EMPLOYMENT

Like educational attainment, an analysis of a community by its employment types and categories provides an important “insite” into its socio-economics. This analysis looks at two factors.

First is a report of the employed population 16 and over by the traditional “blue collar” and “white collar” occupations and compares these to the state. Second, it looks at the community by the seven standard census bureau occupations and compares them to the state.

### EMPLOYED POPULATION: BLUE COLLAR OR WHITE COLLAR

On the chart to the left, the study area is compared to the state of UT,AZ. This study area is close to the state average for White Collar workers. It is close to the state average for Blue Collar workers.

### EMPLOYED CIVILIAN POPULATION BY OCCUPATION

	2023	UT,AZ 2023	Comp. Index	Interpretation
<b>Employed Civilian Pop 16+ by Occupation</b>				
Bldg Maintenance & Cleaning	5.2%	3.9%	136	Well above the state average.
Construction	7.8%	8.6%	91	At about the state average.
Farming, Fishing, & Forestry	0.1%	0.5%	13	Well below the state average.
Food Preparation Serving	5.7%	5.2%	109	At about the state average.
Healthcare Support	4.0%	2.9%	139	Well above the state average.
Managerial Executive	15.8%	16.5%	96	At about the state average.
Office Admin	13.5%	12.8%	105	At about the state average.
Personal Care	2.3%	2.6%	88	Well below the state average.
Production Transportation	13.1%	11.6%	114	Well above the state average.
Prof Specialty	19.9%	22.8%	87	Well below the state average.
Protective	1.0%	2.2%	47	Well below the state average.
Sales	11.4%	10.4%	110	Well above the state average.

## INSITE #10: MOSAIC Segments

Mosaic is a geo-demographic segmentation system developed by and for marketers. Instead of looking at individual demographic variables, a segmentation system clusters households into groups with multiple common characteristics. Demographic variables that generally cluster together would include income, educational levels, presence of children and occupations among others.

This database is developed by Experian. Some find the information helpful because it presents a multi-dimensional view of a community.

In the report below, the top 15 Mosaic Segments of the study area are provided. (If less than 15, rows will be blank.)

**NOTE: For a full description please see the DI Demographic Segment Guide (Mosaic) under the Help menu on the Documents gallery.**

	2023	2023%	State %	Comp Index	Relative to the UT,AZ State Ave.
<b>Mosaic Segments</b>					
O51 Singles and Starters - Digitally Savvy	3,763	8.6%	4.2%	206	Well above the state average
Q62 Golden Year Guardians - Enjoying Retirement	2,888	6.6%	2.0%	330	Well above the state average
Q65 Golden Year Guardians - Mature and Wise	2,439	5.5%	2.3%	242	Well above the state average
L41 Blue Sky Boomers - Booming and Consuming	2,396	5.5%	2.6%	209	Well above the state average
Q64 Golden Year Guardians - Established in Society	1,937	4.4%	3.1%	142	Well above the state average
E20 Thriving Boomers - No Place Like Home	1,825	4.2%	2.5%	165	Well above the state average
H29 Bourgeois Melting Pot - Destination Recreation	1,786	4.1%	0.9%	475	Well above the state average
D15 Suburban Style - Sport Utility Families	1,769	4.0%	1.0%	409	Well above the state average
O55 Singles and Starters - Family Troopers	1,767	4.0%	2.4%	170	Well above the state average
F22 Promising Families - Fast Track Couples	1,588	3.6%	5.5%	66	Somewhat below the state average
K37 Significant Singles - Wired for Success	1,467	3.3%	1.4%	246	Well above the state average
N46 Pastoral Pride - True Grit Americans	1,441	3.3%	1.0%	315	Well above the state average
J34 Autumn Years - Suburban Sophisticates	1,264	2.9%	2.7%	105	About average for the state
F23 Promising Families - Families Matter Most	1,239	2.8%	1.5%	190	Well above the state average
H27 Bourgeois Melting Pot - Life of Leisure	1,179	2.7%	1.3%	205	Well above the state average

# INSITE #11: GENERATIONS

A powerful way to envision demographics is by following a generation through its phases of life. This is because there are, in a general sense, common life experiences at each phase of life. But even more interesting is to understand a generational cohort group that has a unique sense of belonging to others born and coming of age together. More than mere age bracketing, a generation develops a sense of identity as a group based upon their coming of age experiences—how they were parented and major world defining events, such as 9/11. Using the Strauss and Howe model of generations one is able to see a more three-dimensional view of a generational group, bringing mere age demographics to life.

According to the Strauss and Howe model, members of a generation share three qualities. \*

- An age location in history
- Some common beliefs and behaviors, including basic attitudes about risk taking, culture and values, civic engagement, and family life
- A common perceived membership in a generation, e.g., Boomers, Gen X, Millennials etc.

Warm and friendly encounters	43.3%	39.0%	44.1%	35.8%	98	109

# Supporting Information

## Interpreting the Report

The ExecutiveInsite report is designed for easy reading. But there are several tools provided in the tables that make this easier.

**Change over time:** Several trend tables have a column indicating a change over time. Generally these tables begin with the last census, include the current year estimate, a five year projection and if available, a 10 year forecast. The data in each cell represents a percentage change up or down.

**Color Coding:** Both the "Change over Time" and "Comparative Indexes" columns are color coded to easily spot any change and the direction of that change.

Change:	Increasing	Stable	Declining
Index:	Above Ave	Ave	Below Ave.

## Variable Definitions

Full variable definitions can be found in the MI Demographic Reference Guide. Download it free from the Help/Documents menu located on the map screen of your

[Click to download the ExecutiveInsite Worksheet. To open it in a new tab, press Ctrl when you click.](#)

**Indexes:** Some variables will have a column called "Comparative Index." An index is an easy way to compare a study area with a larger area. For this report, all comparisons are with the state or states within which the study area falls. The indexes can be interpreted as follows.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.
